Professional Plus range features

Why Professional Plus?
The Professional Plus line offers a more decisive appearance with larger knobs and handles to accentuate the “professional look” of the cooking cooker. The range offered is much larger in terms of measurements, colours, finishes, and functionality. All electric ovens are the E3 type with standard electronic temperature control that can be regulated from 30°C to 300°C. Finally, below the ovens, there is a convenient removable drawer for storing cooking accessories. This drawer can be used as a food warmer when the oven is on.

Hobs

A wide range with a modular system allows diversified burners with power levels from 1.8 to 5 kW. Sturdy cast iron grills create a single work surface with a double advantage. Pots are more stable and therefore more safe and can be moved from one burner to another without lifting. All models are equipped with a thermocouple safety valve that ensure immediate gas interruption in the event of an anomaly or accidental extinguishing of the burner.

Stainless steel feet
Height from 10 to 16 cm

Plate warmer drawer
Drawer ideal for heating plates while the oven is being used.

All Professional Plus ranges are 60 cm deep.
The entire Professional Plus series comes with:

- **Triple glass cold door** (see page 20)
- **Tangential fan** (see page 21)
- **Sturdy cast iron grills** (see page 22)
- **Safety valves on burners** (see page 22)
